## Illustration for Large Size MNL 3000 & 3100 Series

MNL Plummer block housings are suitable for self aligning, spherical roller bearings and CARB bearings for shaft dia 150 to 340 mm. These housings are split type with 4 elliptical holes in housing base and suitable for grease or oil lubrication. For Grease lubrication variety of seals such as felt seals (TC Type), Labyrinth Seals (TS Type), Double Lip Seals (TG type) or Taconite Seals (ND Type) can be used. For oil lubrication special type of seal (TURU type) can be used. Principal dimensions are identical to SNA/SNH type housings and are interchangeable. MNL housing are available with 4 elliptical slots in the base designated as FMNL or 2 drilled holes in the base with suffix MS1 or 4 drilled holes in the base with suffix MS2. These housings can be used for located bearing by inserting Locating rings on either side of bearing.
